5 Evaluation	49
6 Procedures	57
7 Patient Education	75
Appendix A: Worksheets to Assist You in Implementing Your Prevention Program	
Appendix B: Sample Forms	
References	

How to Use This Guide

This guide was developed to take you through the process of implementing Put Prevention Into Practice (PPIP) by providing the research-based recommendations of the Adult Health Program (AHP), tools, materials, and educational messages. Activities, exercises, and questionnaires are included in each chapter, with ready-to-use copies of each worksheet in Appendix A. Ready to use copies of the AHP and PPIP tools and forms can be found in Appendix B.

It may not be necessary for your clinic to complete all of the exercises and chapters as part of the implementation process. You and your staff should select the information that would be most useful and use the corresponding worksheets to guide you in the process. You may also want to contact the Adult Health Program for assistance with assessment of your current status and for recommendations to simplify the implementation process.

Note: This guide is currently in the approval process and should be considered a draft document.
